DAVID MARTIN JOINS CARNEGIE SCIENCE CENTER BOARD
LOCAL EXECUTIVE BRINGS MANAGEMENT SAVVY, ENGINEERING EXPERTISE

PITTSBURGH, March 6, 2015 — Carnegie Science Center is welcoming David Martin to its Board. Martin is the Senior Vice President of Michael Baker International and principal Executive of the company’s Pittsburgh headquarters.

The new board member brings more than 25 years of experience in operations management, project management, business development, and engineering design of buildings and infrastructure projects in the commercial, federal, and institutional marketplace worldwide. Michael Baker International supports federal, state, and municipal governments, foreign allied governments, and a wide range of private development and commercial clients.

Martin holds a bachelor of science degree in architectural engineering (structural engineering and construction management options) from Pennsylvania State University. He completed graduate studies in civil engineering at the University of South Carolina, and the MBA program at Clemson University. He has completed numerous engineering and leadership training programs and is affiliated with the Society of American Military Engineers, Engineers' Society of Western Pennsylvania, American Institute of Steel Construction, Project Management Institute, US Green Building Council and Leadership Pittsburgh.

“The shortage of engineers and technical professionals will only increase over the next decade,” Martin said. “Carnegie Science Center’s initiatives and leadership in STEM education as a driving force to meet the educational needs of the future drove my interest to be involved with the Board.”

Martin has two college-age children, Summer and Ethan and lives in the Edgewood/Regent Square area with his wife, Ann Felter, where they are renovating a century-old home.

About Carnegie Science Center
Carnegie Science Center is dedicated to inspiring learning and curiosity by connecting science and technology with everyday life. By making science both relevant and fun, the Science Center’s goal is to increase science literacy in the region and motivate young people to seek careers in science and technology. One of the four Carnegie Museums of Pittsburgh, the Science Center is Pittsburgh’s premier
science exploration destination, reaching more than 700,000 people annually through its hands-on exhibits, camps, classes, and off-site education programs.

About Carnegie Museums of Pittsburgh
Founded by Andrew Carnegie in 1895, Carnegie Museums of Pittsburgh is a collection of four distinctive museums dedicated to exploration through art and science: Carnegie Museum of Art, Carnegie Museum of Natural History, Carnegie Science Center, and The Andy Warhol Museum. Annually, the museums reach more than 1.2 million people through exhibitions, educational programs, outreach activities, and special events.
